Beskrivelse

Fine cracklady in steel which is then galvanized - let the length is total approximately 9500mm can be reduced if desired".
770mm - short distance between cross/long arches of 150mm in height - double ramps 1680 + full width 1200mm with powerful cross-sections that clean the soil of tape/wheels before ramping up on the load which is also madvanized - included cylinder and chassis frame for welding at the rear - currently the load length of the plane piece 5600mm + is broken at approximately 1900mm + surcharge on the forward 2000mm which is the card of due to the earlier owner wanted shorter load length. The preparaty with the foreboding is therefore included can let the length adjust as desired.
