Beskrivelse

Regular HC Container 6000 mm /14m3 container for cable hoist

External total length 6300 mm - internal bed dimensions approx. L 6000 x H 1000 x W 2300 mm - volume 14 m3
 300 mm high rear bumper with hydraulic cylinder - the hoses are led forward in the middle of the container so that the oil outlet for the pendulum side can be used

There is a broken hinged fitting on the back cover which must be removed before use so that it can open and close
 The bed base is level and may have been made of Hardox (however, we reserve the right to say whether it is Hardox)

The side skirts on both sides at the bottom are very rusty cosmetically it can look bad but can easily be improved by welding a piece of flat iron on and thus stabilizing the side. The bottom + crossbars are intact, so the bottom and bars are well connected - Small puncture damage in bib

Prepared for a top-hung rear bib in the back, as well as suspension for the one in the front - Middle roller in the back - Welded-on number of replacement HC 1970 - 8739
